

Inputs

Encoders

Transport constraints

Output

Pre-event market state

$X_{<t}$

No-event distribution

(μ_0, σ_0)

Protected mean

$\Delta\mu_r = 0$

SEC 8-K disclosure

e_t

Disclosure bridge

$B(e_t)$

Allowed shifts

$\Delta\mu_{\sigma, \nu}, \Delta\log\sigma^2$

Event response

(μ_1, σ_1)
